Infinity Precision Inc. (IPI)

Infinity Precision Inc. (IPI) is a one stop shop for modern day and legacy aircraft parts. Our experience with modern day and legacy aircraft platforms allows us to manufacture parts from loft contour books, 50 year old prints, or supplied 3D models. Combined with our traditional and CAD driven inspection equipment, Infinity can ensure products meet your design requirements.

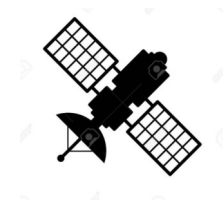

Infinity also works directly with the US government. We are familiar with Source Inspection and flowing down government contract requirements. Infinity is also approved for the Alternative Release Procedure (ARP).
